

# JAIKRISHNA (JAI) V. RAGHAVAN

Albuquerque, NM · jragh25@terpmail.umd.edu · linkedin.com/in/jai-raghavan

## EDUCATION

### University of Maryland

Bachelor of Science, Computer Science - Cybersecurity Track, Minor in Linguistics

National Merit Scholar

Honors College - University Honors Citation

GPA: 3.7

College Park, MD

Graduated May 2025

## SKILLS

Programming: Python, .NET/C#, SQL, JavaScript, Java, C/C++

Development: TensorFlow, FastAPI, React.js, Angular.js, Node.js, MongoDB, Microsoft SQL Server, Linux

Tools: Git, Azure DevOps, Visual Studio, Powershell, Jira

Cloud: AWS, Azure

## EXPERIENCE

### New Mexico Legislative Council Service

Software Engineer

Santa Fe, NM

Sep 2025 - Present

- Developed middleware in **.NET** to integrate a new legislative system with legacy databases and servers
- Implemented data pipelines for instant updates of vote and legislative calendar data by reading requests from an **Azure Service Bus** message queue
- Created dynamic UI components for legislative journal actions in **Angular.js**
- Provided 24-hour support for the legislature's website and backend systems during legislative sessions

### Senseonics

Software Engineering Intern

Germantown, MD

Jun-Aug 2022, 2023, 2024

- Debugged and resolved concurrency errors to reduce failure rate by 20% in **multi-threaded .NET applications**
- Developed the frontend logic and design of a Quality Control automation app in **.NET/C#**
- Refactored a legacy **ASP.NET** web application and migrated data from multiple **SQL Server** databases to generate a table with live data for over 10,000 transmitters

## PROJECTS

### Image Classifier - TensorFlow, FastAPI, AWS

- Built and trained a convolutional neural network to classify images in **Python** using **TensorFlow**
- Achieved over 80% accuracy by training the model against the CIFAR-10 image dataset
- Deployed the model to a **FastAPI** endpoint and hosted using **AWS**

### Nonogram Game Player and Solver - FastAPI, React.js

- Created a playable Nonogram game that lets users generate and solve Nonogram grids.
- Used **FastAPI** for the backend and **React.js** for the frontend.

### Fantasy Football Data Lookup - MongoDB, Express, Node.js

- Developed a fullstack web application that allows users to search for fantasy football data.
- Accessed NFL player game and season usage data using ESPN's **REST API** endpoint.
- Leveraged **Node.js** and **Express** for the backend API and **MongoDB** to store player data.
